HATCHERY PRODUCTION

Commercial hatcheries in the United States produced a total of 3,104 million broiler-type chicks during 1974. This is a decrease of 3 percent from the 1973 production of 3,207 million broiler chicks.

Production of egg-type chicks in 1974 totaled 473 million, down 11 percent from the 1973 hatch of 534 million.

Commercial turkey hatcheries produced 140 million poults during 1974, down 4 percent from the 1973 hatch of 146 million. Heavy breeds hatched, at 126 million, were down 3 percent while 14 million light breeds were hatched, 14 percent below 1973.

NUMBER OF HATCHERIES AND EGG CAPACITY, JANUARY 1, 1975

The number of chick hatcheries operating in the United States on January 1, 1975 was 797 compared with 989 on January 1, 1973. Current egg capacity was reported at 416 million compared with 436 million two years earlier. The number of hatcheries was below two years earlier in all size groups. However, the capacity was above January 1, 1973 in the 60,000 to 99,999 and 100,000 to 199,999 size groups down in the other size groups. The total capacity of the 500,000+ hatcheries was above January 1, 1973 in all regions except the East North Central and the South Central.

On January 1, 1975, a total of 179 turkey hatcheries were in operation compared with 203 on January 1, 1973. During this period, egg capacity declined from 44.6 million to 41.4 million, or 7 percent.

The number of turkey hatcheries in the Nation with a capacity of 200,000 or more eggs declined from 83 to 72 and egg capacity dropped 7 percent from January 1, 1973. On January 1, 1975, this size group accounted for 77 percent of the total capacity in the United States.
